

CLI

ng analytics

Configures the gathering of Angular CLI usage metrics. See <https://angular.io/cli/usage-analytics-gathering>.

ng **analytics** *<settingOrProject>* *<projectSetting>* [*options*]

Description

The value of *settingOrProject* is one of the following.

- "on" : Enables analytics gathering and reporting for the user.
- "off" : Disables analytics gathering and reporting for the user.
- "ci" : Enables analytics and configures reporting for use with Continuous Integration, which uses a common CI user.
- "prompt" : Prompts the user to set the status interactively.
- "project" : Sets the default status for the project to the *projectSetting* value, which can be any of the other values. The *projectSetting* argument is ignored for all other values of *settingOrProject*.
